

Delivering best possible outcomes for the NHS

The **fear of legal challenge**, concern over **delivering the best value for money** and pressure to **make your budgets stretch** further every year are just a few of the challenges NHS procurement projects face. Issues such as **transforming patient care** and **improved collaboration** at a local, regional and national level will also be high on your agenda when considering and planning how your strategic procurements can achieve the best possible outcome.

That's why for over 10 years, we've been helping NHS organisations to overcome these challenges. Our in-depth experience of supporting NHS complex procurements includes:

Supporting key NHS challenges

Through our [AWARD® Suite](#) and [expert services](#) we help the NHS by:

- **Reducing the risk** and uncertainty of complex projects
- **Saving time** by minimising delays to project delivery
- **Protecting decisions** from legal challenges
- **Shortening time** to contract by an average of 40%
- **Managing multiple stakeholders** to ensure collaboration
- **Improving value for money**

How do we support NHS procurement teams?

Our AWARD® Suite combines expert thought-leadership, training, and market-leading software modules.

AWARD® has been specifically designed to:

- Apply a robust and transparent structure throughout the entire procurement process
- Work with your existing procedures to deliver best possible outcomes
- Span all project production, assessment scheme design and evaluation and debrief stages
- Provide modular applications and support so you can get the specific support your project needs

What our NHS clients say:

“AWARD® eases the rather onerous job of evaluation which means we achieve a wider review panel and this, coupled with the structure of the tool, supports a robust compliant process.”

Fiona Maton
Southern Health NHS FT

“AWARD® was a simple to use system which allowed a complex evaluation process to be simultaneously completed by several people. The system’s transparency helped to ensure that the contract was awarded with no challenges to the procurement process.”

Alain Rolli
The Royal Wolverhampton NHS Trust

“Allowing the large number of external stakeholders to input their data directly into AWARD® [] had the effect of speeding up the whole process and, I believe, enhanced the quality and contribution they were able to make.”

Rob Elek
Oxford Radcliffe Hospitals NHS Trust
