AWARD® Reporting

The reporting capability in AWARD® is comprehensive and wide-ranging across all the modules. Standard templated reports are available 'out of the box' and an easy to use Report Wizard enables creation of any other reports that may be required by the procurement team or senior management. Seamless export to Microsoft Excel® and Word® supports further analysis, use of standard templates and effective sharing of information.

SCD
• Themes/Subjects flow & reasoning
• Evaluation aims
• Traceability
• Criteria & evaluation structure

RVfM

Procurement solutions to deliver the best possible outcome

AWARD® App

The AWARD® App delivers a set of project updates directly to mobile devices and tablets. It enables Project Managers and Administrators to access key data quickly and easily, ensuring that they stay informed on critical projects at all times, wherever they are.

- View your licence status data, including expiry date, number of active, inactive and archived users

- View the progress of individual procurement stages

- View project status changes

- Progress indicators for evaluation team members enable you to keep track of your procurement, ensuring deadlines are met

- See when new questions are submitted by your evaluation and moderation teams

- No sensitive data is transmitted, maintaining the high level of security required by our clients

- The App is available on iOS and Android devices. It requires a valid AWARD® Evaluation user account and is available to Administrators and Project Managers
