

Integration Capability

Commerce Decisions operates within a unique, niche space in the procurement technology market, supporting the most complex, high risk, high value projects and programmes. Our AWARD® solution offers a depth of functionality not offered by traditional tendering/eSourcing systems, and is the only solution in the marketplace that has been specifically designed to support strategic procurements. AWARD® is therefore frequently deployed to complement existing 'end-to-end' sourcing solutions, and has been integrated successfully across our client accounts with several different technology providers.

AWARD® can be enriched by moving data between your external systems, including industry leading eSourcing platforms. This enables organisations to apply a 'best of breed' approach; deploying the solutions best suited to their processes and requirements. In these scenarios, AWARD® is used to support the larger/more strategic projects whilst a tendering tool is used to undertake the less complex, more tactical procurements. eSourcing systems might include components such as vendor prequalification, RFX support, tendering and negotiation tools.

The evaluation capability presented by tendering tools within these suites tends to be fairly basic. They invariably do not have the flexibility, scalability and appropriate tools to support the people, processes and data involved in major procurement projects. This means that for the complex or strategically important procurement projects these systems are somewhat lacking.*

Use of AWARD®'s Integration capability streamlines the end-to-end evaluation process. The risk of error in exporting data and/ or managing the evaluation in spreadsheets is mitigated, and efficiencies are realised by minimising labour intensive processes.

Where appropriate, 'single sign-on' functionality delivers a seamless experience for users and ensures easy access across the solution set. Transfer of data between systems is simple, secure and audited.

- Enables a 'best of breed' solution
- Fully audited processes and transparency
- Secure transfer of data
- Simplifies internal processes and reduces risk
- Seamless user experience
- Increased ability for data collection and analysis
- Improved communication with internal and external users

* For a more detailed analysis of where AWARD® sits in relation to other procurement technologies on the market, please refer to our white paper titled 'AWARD® in the Sourcing Tools Market' (available to download from the Resources area of our website: www.commercedecisions/resources).

Procurement solutions to deliver the best possible outcome

Integration Capability

- AWARD’s Integration capability allows other systems to interact with AWARD®. It offers the capability for other systems to link to various key touch points in AWARD®.
- AWARD’s Integration capability is extensible, with minimal work required to the other platform. The “pull” interface has been designed to allow the rapid development of an integration facility with other systems. This allows for the transfer of data including response documents and questions.
- Where required, information can also be ‘pushed’ from AWARD® to target systems. For example; user progress information, evaluation results and detailed reports.
- AWARD’s data structure allows the linking of supplier responses in any format (text, numerical information, documents, etc) to the evaluation model.

Code	Name	Type	Description
HL1436-5-01-01-01	Confirmation Document	DOCUMENT	Please complete and attach the confirmation document
HL1426-Q-01-01-02	Financial and Insurance Statements	DOCUMENT	Please complete and attach your financial and insurance statements
HL1426-Q-01-02-01	Summary Statement	TEXT	Please make a summary statement of availability of services
HL1426-Q-01-03-01	Availability Information	DOCUMENT	Please support your availability statement with any additional information you wish to provide
HL1426-Q-01-03-02	Summary Risk Statements	TEXT	Please make a summary statement of how health and safety risks will be managed and include any accreditation you have.
HL1426-Q-01-03-03	Health and Safety Policy	DOCUMENT	A copy of your signed health and safety policy must be attached
HL1436-Q-01-03-01	Certificates	DOCUMENT	Proof of accreditation must be attached
HL1436-Q-01-04-01	Please inform you comply with UK Environmental legislation	TEXT	Refer to the CO2/CO2e for relevant information
HL1426-Q-01-04-02	Environmental Legislation Supporting Documentation	DOCUMENT	Please attach any further documentation to support your statement
HL1426-F-02-01-01	Operations Management	DOCUMENT	Attach your operations management document
HL1426-F-02-01-02	Incident Management	DOCUMENT	Attach your incident management statement
HL1426-F-02-01-03	Risks and Charges Information	TEXT	Make a summary statement of risks and charges
HL1426-F-02-02-01	Service Implementation	DOCUMENT	Attach Service Implementation Plan
HL1436-F-03-03-02	Invoicing	DOCUMENT	Summary statement of invoicing
HL1436-F-03-03-03	Invoicing Period	TEXT	Please choose your invoicing period
HL1426-C-03-01-01	Pricing Spreadsheet	DOCUMENT	Please attach the pricing spreadsheet
