

CDP INTEGRATION

Go Beyond Basic Compliance

Advanced capabilities for Procurement Act 2023 (PA23) and Central Digital Platform integration that transform how contracting authorities manage procurements.

ABOUT COMMERCE DECISIONS

Trusted by public sector organisations worldwide, Commerce Decisions combines expert procurement consultancy with its AWARD® software.

AWARD® integrates with existing procurement platforms or operates standalone to deliver rigour, assurance, and confidence to high-value procurements.

The Procurement Act 2023 Challenge

Meeting PA23 requirements is just the starting point.

Contracting authorities need a solution that doesn't just tick boxes – it transforms how you manage procurement notices from creation to publication and beyond.

The AWARD® integration with the Central Digital Platform (CDP) delivers exactly that.

Why AWARD[®] Stands Apart

Bulk Notice Publishing at Scale

Publishing hundreds or even thousands of notices? AWARD[®]'s bulk upload capability handles UK1 Pipeline notices and more – automatically importing, validating, and publishing in one streamlined workflow. What would take days of manual effort now takes minutes.

PERFECT FOR LARGE FRAMEWORKS

Total Flexibility with Republishing

Procurement plans change. AWARD[®] lets you republish permitted notices to the CDP whenever needed, giving you complete control over your procurement communications without starting from scratch.

PERFECT FOR DYNAMIC ENVIRONMENTS

Seamless OCID Linking

Already published notices through the CDP web portal or another eSender? No problem. Link your AWARD[®] procurement to existing notices using the OCID – maintaining full continuity and compliance.

PERFECT FOR INTEGRATIONS

Smart Supplier Data Import

Suppliers enter their CDP ShareCode and AWARD[®] automatically pulls in their standard information. Allocate policy modules to specialist evaluators with ease.

Draft and Validate Locally

Build notices in advance, validate against CDP requirements, and catch errors before publication. Confidence built in.

Intuitive Notice Creation

Our single-page interface dynamically shows only relevant fields based on your selections. Create PA23-compliant notices without the complexity.

AWARD[®] integrates seamlessly with the Central Digital Platform, ensuring your procurement processes aren't just compliant – they're optimised for efficiency, accuracy, and scalability.
